Make It Work

An efficient kitchen loses its serious edge with a flair of whimsical details, such as patterned chairs, a tiled wall and splashes of color in the cabinetry and accessories. The room's layout is constructed with a cook in mind.

Designer Alison Green offers these tips to achieve a well-balanced kitchen:

1. **Include a stack of drawers or two** next to your cook top, so utensils, pots and pans are always within reach.
2. **Keep countertops clean and clutter free** with an appliance garage, keeping appliances hidden when not in use, yet accessible when needed. Make sure to install outlets!
3. **Make space for a pantry where there is none** by installing a tall, 30-inch cabinet with rollout trays or a tall pullout pantry unit.
4. **Opt for a built-in fridge, or consider a budget-friendly option** of a counter depth-fridge. Install tall side panels and a cabinet above to conceal the fridge's edges.
5. **Utilize your corners with the help of a Lazy Susan corner cabinets.** Or, even better, consider a LeMans shelf cabinet, which allows you to bring out the entire shelf from the cabinet for full access.
6. **Switch vinyl plank flooring** if you love the look of hardwood, but don't want to deal with the maintenance. Vinyl is resistant to pesky dents and scratches.

Base Hit

Designer Jill Kalman of Bella Interiors added a custom kitchen table with comfortable seating for the eat-in area. "Modern swivel stools were added at the bar to provide the ability for conversation with the main table when entertaining and the chairs also lower to standard seat height, so they can be brought in as 'extras' when entertaining as well," says Jill. The attention to such accents as a double sink and overhead space for a microwave make it an efficient, multipurpose space.
